

Medic 51- 2016 Ford E450 Type III Road Rescue ambulance M-51 is in service 12 hours daily from 8:00am - 8:00pm and is a back up to Medic 52. This unit is equipped with Stryker power load, power cot, and Lifepak 15 cardiac monitor. This unit has 200,000 miles and is scheduled to be refurbished January of 2025 and will be back in service April of 2025 .

Medic 52- 2021 Ford F550 4x4 Type I Braun ambulance.

Medic 52 was placed in service in late 2021 and is an advanced Life support (paramedic) vehicle which is in service 24 hours a day seven days a week (less maintenance time). This unit is equipped with Stryker power load, power cot, and Lifepak 15 cardiac monitor.

projected replacement 2029

Bravo 53 - 2015 G4500 refurbished McCoy Miller ambulance

Bravo 53 is a Basic Life Support (BLS) unit and is used for a back up ambulance when one of the primary units are out of service, or used for third / fourth ambulance out for calls with off duty personnel who come back in to serve the community. BLS units still have the capability of being upgraded to ALS when Medic 51 or Medic 52 goes out of service. Bravo 53 can be jump upgraded when staffing allows to Advanced Life Support.

Bravo 54- 2024 Chevy G3500 Crestline type III ambulance

Bravo 54 is a Basic Life Support (BLS) unit and is used for a back up ambulance when one of the primary units are out of service, or used for third / fourth ambulance out for calls with off duty personnel who come back in to serve the community. BLS units still have the capability of being upgraded to ALS when Medic 51 or Medic 52 goes out of service. Bravo 54 can be jump upgraded when staffing allows to Advanced Life Support.
